

A view of downtown Pittsburgh from Station Square. The relatively low buildings along Fort Pitt Boulevard, constructed in the 1860's to the 1890's, give a human scale to Pittsburgh.

Downtown Landmarks: Geometry on Firstside

Outline at least one example of each of the following in the photograph above.

- | | | | |
|----------------|--------------------|-------------------------|---------------------|
| 1. triangle | 6. trapezoid | 11. obtuse angle | 16. horizontal line |
| 2. rectangle | 7. pentagon | 12. perpendicular lines | 17. vertical line |
| 3. square | 8. a tilted square | 13. parallel lines | 18. tessellation |
| 4. semi-circle | 9. right angle | 14. diagonal lines | |
| 5. circle | 10. acute angle | 15. adjacent lines | |
